

Name: _____ Date: _____

Seventh Grade - Sculpture - Project 1

Rubric: Due _____

Collaborate to create a sculpture

Initially, work individually for approximately 4 days

Use the cloth or paper medium to write, draw or paint a message or picture

Work as table unit to combine all the individual sculptures of the unit

Consider the message as an individual then as a group

Record the process

Materials: _____

Rationale: Consider the properties of your materials: What can my materials do for my individual contribution? What can the materials do for the group if we pool our resources and talents?

What is the message you desire to share, as an individual?

How can your idea work as a group project? What do you need to do - what does the group need to do

How might you evaluate the other individuals in your group, (what are you going to assess?)

Explain what you might learn from this assignment?

On the back draw your ideas as an individual. Draw what your concept of the installation should be as a group. Draw how the installation should look like in the space.
